

Top Crop

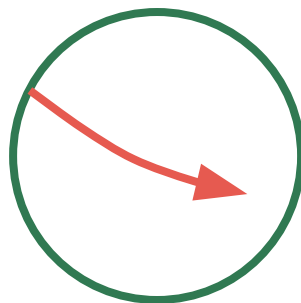

Sow smart!

Flop crops ahead

Indicator scores for rainfed agriculture

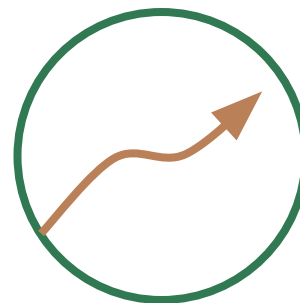

Climate change increases the risk of drought (and other hazards)¹

~20%

Projected decrease in crop yields across Europe by the mid-2030s²

~50%

Projected increase of food demand by 2050³

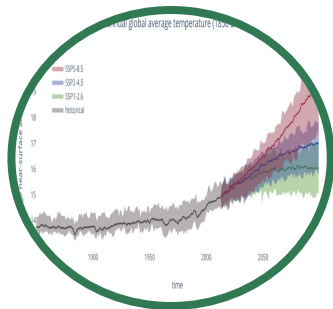

¹ IPCC AR6, WG II. 2022.

² EU agricultural policy and climate change, James McElDowney, European Parliament Briefing, May 2020

³ *Climate change impacts on crop yields*. Ehsan Eyshi Rezaei, Nature 2023

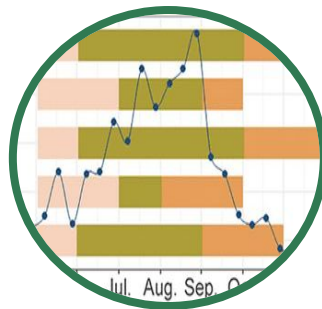

Top Crop App: Seed innovation, reap prosperity

Foreseed
your future

Obtain the latest climate projections
for the location of your farm

Plant in
advance

Sow long term crops that
adapt with the economical
and climatic conditions

Your soil,
our toil

Get personalized advice
thanks to our sampling kits.

We project your project

- State-of-the-art climate projections
 - Choose regions covered by your fields
 - Enter the foreseen time span of your activity
- Latest agronomic research
 - Get recommendation of resilient crop mixes
- Community-fostered approach
 - Rate the recommendations
 - Exchange with your local community

A tad crap VS a Top Crop
